VTCRC Mentoring Program seeks donations

The VTCRC Mentoring program is a brand-new program modeled after the Big Brothers Big Sisters Beyond School Walls program, and it is designed to be a partnership between Big Brothers Big Sisters, Virginia Tech Corporate Research Center, and Montgomery County Public Schools. The purpose of this program is to promote STEM education through mentoring. During the school year, Bigs and Littles will create and foster their relationship, and Big Brothers Big Sisters will track the outcomes and impact made.

The Mentoring program is in need of desktop and laptop computers for the program for both administrative work and creative projects for the kids. If you have any computers that you would be willing to donate to the program please reach out to [Shana](#) at New River Computing.

Announcement of end of sales for computers with Windows 7 Professional pre-installed

Please be aware that after October 31, 2016, we will no longer be able to purchase computers with Windows 7 pre-installed. After October 31st, computers will come with Windows 10 pre-installed. (For further information, please see [Windows Life Cycle Fact Sheet](#)). New Dell systems with Windows 10 Professional are legally downgradable to Windows 7. This will increase the setup cost of a new computer, and is only possible if Dell provides appropriate Windows 7 drivers. If you would like to talk about purchasing new computers with Windows 7, please call Shana at 540-808-2900.
