IP Telephone Service **P.1**

Phinneas the Frog **P.1**

HeartChase **P.2**

Congrats to Tim Coyle **P.2**

Rising Star Nomination **P.2**

We have partnered with FreedomVoice to offer IP Telephone Services!

Hosted Voice over IP Private Branch Exchange (Hosted VoIP PBX) is an Internet based phone system connected to a private branch exchange system which is hosted, or managed by a third party. Because a Hosted Voice over IP Private Branch Exchange (hosted VoIP PBX) system is managed by a third party, the PBX system is often located in a remote and safe location, as opposed to on the business' premise. In addition, many times the hosted VoIP PBX provider is also a VoIP service provider. Businesses often value hosted VoIP PBX systems, because they are more hands-off than IP-PBX systems, as everything is managed by the hosting company.

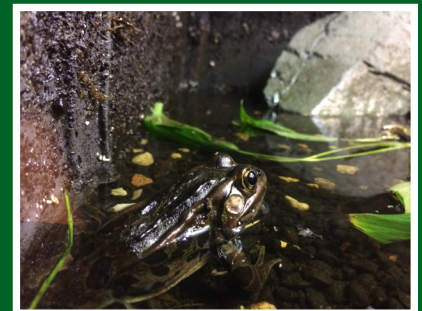

Why did we choose FreedomVoice?

- Simple and easily scalable with enterprise quality
- Cost savings
- Auto Attendant
- Easily customized
- Detailed reporting
- Business Continuity
- CRM Integrations
- Multiple locations and remote or home based employees are no problem
- US based customer service

Meet Phinneas the Frog!

New River Computing sponsored a frog on display at the Science Museum of Western Virginia. The frog was nicknamed 'Phinneas' by staff here at NRC. Phinneas is a Northern Leopard Frog (*Lithobates pipiens*), a species which is native to the United States and Canada. The 'Frogs!' exhibit runs from March 15 - June 7, 2014.
